

September 21, 2023

Robert M. Califf, M.D., Commissioner  
Food and Drug Administration  
U.S. Department of Health and Human Services  
10903 New Hampshire Avenue  
Silver Spring, MD 20993

Dear Commissioner Califf:

In a coordinated effort of The Skin Cancer Foundation and Refinery29, part of the VICE Media Group, we, the 7,490 undersigned, respectfully urge the U.S. Food and Drug Administration to take suitable actions to finalize the proposed rule entitled General and Plastic Surgery Devices: Restricted Sale, Distribution, and Use of Sunlamp Products (Docket No. FDA-2015-N-1765) published by the FDA in the Federal Register on December 22, 2015 (80 Fed. Reg. 79493).

The dangers of indoor tanning are well documented. Indeed, the FDA acknowledged this when the agency reclassified sunlamp products from class I to class II high risk medical devices in 2014. Tanning bed use drastically increases skin cancer risk, including the risk for potentially deadly melanoma. In fact, a 2016 study published in the JAMA Dermatology found that of 63 women diagnosed with melanoma before age 30, 61 of them — 97 percent — used tanning beds.

Over the years, The Skin Cancer Foundation has heard from hundreds of former tanning bed users who are fighting skin cancer. Many lament that they did not fully understand the risks they were taking.

By finalizing the proposed rule, the FDA can curb tanning habits among Americans and significantly reduce the incidence of melanoma and nonmelanoma skin cancers in the United States.

Thank you for your attention to this urgent public health matter.

Sincerely,  
(Signatures follow)
